Suggestion No. 1279

Date	or	Buggestica:	11	Onto	Jen,	1954	
		C	ffic	e of	Ope	eration	3

A. Summary of the Suggestion:

25X1A

Suggester proposes the installation of an automatic underscore key on all IBM Electromatic typewriters.

B. Evaluations of the Concerned Offices:

Chief, Business Machines Service on 21 June 1956 made the following statement:

"All new machines are equipped with automatic underscore key. Old machines can be equipped for a cost of about \$3.00 for each machine.

"This is a good suggestion and should be followed up where the need exists."

"Comments and evaluations received from DD/I, CCR and OO failed to disclose that the suggestion has either been adopted or that any real benefit will be derived by the Agency.

C. Resomendation of the Executive Secretary:

16 January 1957

MEMORANDUM FOR: Chief, Suggestion Awards Staff

FROM:

Chief. O & M Staff (DD/S)

SUBJECT:

Erief of Suggestion Files No. 1513 and 2126

- 1. Suggester submitted his first recommendations in regard to Travel Order Form and method of preparation on 1 February 1955. Specifically, he suggested (1) that the Travel Order Form be preprinted on ditto to insure sufficient copies, (2) that the form be on legal size paper to allow additional space under the Special Provisions section and (3) that the form be redesigned to allow for easier sterilization and additional space for Budget and Fiscal use. File No. 1513 was staffed out and received the following comments from the indicated offices:
- a. Records and Services Division stated, by memorandum of 4 Movember 1955, that the suggestion as a whole would offer a "great deel of improvement" in travel order processing and format. This statement was supported by reference to only the ease of starilization effected by the format. Exception was taken to suggester's indication of need for additional space in the Special Provisions Block.

25X1A

- b. Memo to IAS from ______ Acting Comptroller, dated 17 November 1955 commented that the addition of a block for certification of availability of funds by the budget officer would be worthwhile, but that others of the suggested additions "would not seem necessary or applicable for a general travel form."
- c. In a memorandum dated 3 March 1955,

 Assistant Management Officer, DD/S Area, recommended the adoption
 of the suggestion for the reasons that it would eliminate the Request for Advance Form, provide sufficient legible travel order
 copies and eliminate the preparation of the Request for Travel
 Order Form, In addition, a savings estimate of \$15,000 per year
 was indicated.
- 2. The suggester on 10 November 1956 submitted an additional proposal (No. 2126) relative to No. 1513, which suggested the rubber stamping of Request for Advance on the bottom or reverse of Travel Orders. Comments and evaluations were then solicited on both suggestions.
- a. A memorandum for the Record, dated 17 February 1956, signed by Chief, Forms Management Branch, stated in reference to No. 1513, that in the opinion of the Branch, 12 copies of a Travel Order are sufficient for distribution, Central Processing Branch requiring only 8 copies and good Records Management necessitating only 4 copies for internal distribution.

Approved for Release 2003/03/10 CIA RDP80-06832A000200070038-7

1513 and 2126 Con't.

25X1A

b. Executive Officer, Office of Personnel, in a memorandum dated 20 July 1955 expressed the following opinions in regard to Suggestion No. 1513. While the suggested revision of the Travel Order Form was basically good, other changes than those proposed were desirable because of subsequent changes in statutory requirements and administrative procedures. A ditto or similar process style of preparation would not be more advantageous from the cost standpoint and the Office of Personnel is not staffed to assume the workload involved in performing the duplicating service. An award was recommended based on intangible benefits to a limited number of individuals resulting from more convenient arrangement and spacing of items on the TO Form.

25X1A

c. Technical Accounting Staff, evaluated Suggestion No. 2126 and recommended its rejection as impractical because it would create the following problems,

- (1) Cause possible duplication of an advance by confusion over which copy constitutes an original approval.
- (2) Cause loss of control as to when the advance of funds would be granted in relation to the actual travel time.
- (3) Involve the very likely possibility that information on the reverse side of a document will be overlooked. Since the Request for Advance constitutes a certified document authorizing payment and becomes a disbursing record and receipt for each paid out, it is important that this continue to be a separate document for the record.

25X1A

d. EE Admin Officer. submitted an evaluation of No. 1513 and 2126 dated 1 October 1956, his comments based on the practices and procedures of that Division. EE Division prepares, by electric typewriter, only one set of orders (12 copies) which satisfies its requirements. These Travel Orders are prepared on a centralized basis in the Budget Section based on requests from other components of the Division. In the opinion of the Division, use of pre-printed ditto would involve more work than the present system, requiring additional equipment and personnel. The Division needs no additional space under "Special Provisions" and does not require a section on the form for budget officer use inasmich as the present form contains the necessary information and the TO number is used as the obligation reference. Merit was found in the recommendation to facilitate forwarding to the field by elimination of words or phrases requiring sterilization and by provision for inclusion of space for psuedos. However, the Division is forwarding copies of To is tanke of the release zoos residence in the contract and the contract substituting psuedos for true names. C

Approved For Release 2003/03/10: CIA-RDP80-00832A000200070038-7

25X1A	Assistant SSA-DD/S, in a mamorandum to the Executive Secretary SAS dated 3 January 1957, stated that Suggestion No. 1513 would benefit only FE Division and would therefore not appear appropriate for Agency-wide adoption further indicated that FE Livision is currently in the process of centralizing the issuance of Travel Orders in the BF Section and that this action should eliminate its requirement for more than 12 copies of the Travel Order.	25X1 <i>F</i>
25X1A	3. On 10 anuary 1957, presently with the Building Planning Staff, formerly Assistant Management Officer DD/S Area, provided the following information in regard to his memorandum of, March 1955 in which it was estimated that \$15,000 in savings would result if Suggestion No. 1513 were adopted. The savings estimate was based on the supposition that the proposed travel order form and procedure would be used on an Agency-wide basis and that there was a need for more than 12 copies of each travel order. Inasmuch as	25X1A
25X1A	indicated in his memorandum of 3 January 1957 that the suggestion would only benefit FE Division, the estimate was overstated. Further, since also advised that FE Division is currently centralizing its issuance of Travel Orders to eliminate the need for more than 12 copies, that the entire savings estimate was no longer relevant.	23/17
25X1A	Assistant SSA-DD/S, advised on Illianuary 1957 that the centralization of Travel Order issuances in the BF Section of the FE Division was part of an overall centralization of administrative functions in that Division and was not due any way to the suggestions of contained in SAS File No. 1513.	25X1 <i>F</i>
	5. It is recommended, in view of the evaluations and comments received concerning Suggestions No. 1513 and 2126, that both be rejected for reason of impracticality and lack of application to Agency procedures.

	10 January 1957	
	MEMORANDUM FOR: Executive Secretary, Suggestions Awards Committee	
25X1A	SUBJECT : Employee Suggestion # 31-W, Submitted by	
25X1A	l. It was suggested that an electric motor-driven gate be installed at the service entrance of Building " (Copy of suggestion attached; Exhibit A.) A copy was submitted under cover of a memorandum, dated 12 December 1956. (Copy attached; Exhibit B.)	
	2. The suggestion, at the time it was submitted, was an entirely new idea.	v
25X1A	3. If the suggestion had been adopted, the most important benefits would have been derived by the Research and Development Laboratory, since it would have eliminated work stoppages of highly paid electronic engineers to open and close the loading gate at	
	4. To adopt the suggestion, as submitted, would have created an unguarded means of entrance to this building which would have defeated the security in effect.	
	5. The suggestion, as submitted, if adopted, would have contributed to a saving of at least ten (10) man-hours per month; GS Grades 9-12. It would not have lessened the requirement for personnel or released personnel for other duties. The morale would have been bettered.	
25X1A	6. The Suggestion Awards Committee did not recommend the adoption of the suggestion since it would have presented a security problem.	

25X1A

Approved For-Release 2003/03/10 : CIA-RDP80-00832A000200070038-7

	7. The suggestion was not adopted as presented,	25X1
5X1	recommended an alternate plan	
	which has eliminated the problem brought out in the suggestion.	25X1A
05)/44	/ A	25X 1A
25X1A	accepted the recommendation and work was completed 9 January 1957.	
	8. Although the suggestion was not adopted, theSuggestion Awards Committee feels that a cash award to the suggestors is appropriate inassuch as the suggestion did point out: (1) an unsatisfactory situation; (2) caused an extensive survey to be made and (3) resulted in specific steps being taken to eliminate	25X1A
79	the problem.	
	9. Changing the perimeter fence at to enclose the	25X1
	approach readway from a point just below service gate	25X1A
	has contributed to:	20/(1/(
	nas concilibated so	
	a. More efficient operation of the .	
	guard force.	
	b. A saving of a minimum of ten (10) man-	
	hours per month for personnel in	
	Grades GS-9 and above.	
	c. Better morale among employees of the Research and Development Laboratory.	
	d. A most definite increase in security.	
25X1A	10. In view of the above and also attachments, Exhibits A-D, the Suggestion Awards Committee recommends for approval a cash award of \$100.00 to be divided equally between the suggestors. It was determined that the degree of intangible benefits falls within the category "Moderate" and extent of application within the category "Local."

SERVICE ENTRANCE GATE TO

means a waste of approximately \$26.68 per month.

The specifications and contracts have been drawn up to change the heating system and add air conditioning to _______ by an "outside" company. This work is slated to be started and finished during the next year. This will mean an addition of at least two, and probably more, openings and closings of the gate each day to admit workmen and their trucks and supplies to the building. These added openings and closings will up the average to three plus each day, or a waste of twice as much or more time than that amount stated above.

about double the figures stated above. These men have base salaries of \$5500 aver per annum, or \$2.64 per hour. This added responsibility

Our suggestion is to install an electric motor driven gate which can be operated from the office of the secretary and/or from a position just inside the service entrance of the building. The gate is visible from the windows of the above-mentioned office and will entril little effort on her part to operate the motor switch controls.

The price of a gate of this type is unknown to us due to out limited knowledge in this field. However, complete installation cost should be considerably less than one years waste of \$330 as outlined above. This gate will be more secure than the padlock now in use for the gate cannot be opened without operation of the motor.

RECOMMENDATION

It long has been recognized that existing procedures for control of the service gate at from the standpoint of both security and personnel utilization. are undesirable 25X1A A recent study of security controls at all ____Stations, involving distribution of guard personnel and entrance procedures has 25X1A resulted to a decision which will alleviate the unsatisfactory Altuation The perimeter fence 25X1A will be changed to enclose the approach readway from a point just below the service gate. The guard house will be moved below the service 25X1A gate and when the change is completed, the gate will remain open during normal working hours. Direct control by the guard on duty will be maintained. This gate will then be used for both vehicular and pedestrian traffic and entrance will be permitted by the guard after appropriate check with Laboratory personnel.
